Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07 August 2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hawley (US 166,004) in view of Chisholm et al. (US 1,069,854). Hawley ('004) discloses a device comprising a solid circular disc (A) having an upper surface and a lower surface and a central bore in the axial direction (see Figs. 1 and 2). One of ordinary skill in the art would understand that a shank passed through the bore, to transfer for from or two the disc. A plurality of generally rectangular upwardly and downwardly extending blades having upper and lower ends are disposed with the upper and lower ends above and below the disc thereby forming a frameless structure and configured and dimensioned to extend beyond said upper and lower circular disc surfaces in an axial

direction, as well as extending outwardly in said peripheral direction away from the disc, and wherein each of said blades is inclined at about 40 to 50 degrees from where a radius of the disc intersects the blade (see Figs. 1 and 2). The blades are slightly curved rather than completely flat. Chisholm ('854) is relied upon as evidence the flat blades are recognized in the art as an alternative to curved blades (see page 1, lines 79-81).

Response to Arguments

4. Applicant's arguments are moot due to the new grounds for rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID L. SORKIN whose telephone number is (571)272-1148. The examiner can normally be reached on Mon.-Fri. 7:30AM-4:00PM.
